

MUSCLE MAX

Palatable liquid amino acid, antioxidant and B vitamins combined to support muscle development

CONTAINS

L-Lysine – to maximises bone and muscle growth

B vitamins – for protein and energy metabolism

Vitamin E – a powerful antioxidant

Rich in antioxidants to support fertility

USES

In young or weak horses, or during sales preparation; Muscle Max uses essential amino acid L-Lysine, Vitamin E, Selenium and B vitamins to aid muscle build up, guard against cell injury and optimise protein and energy use within the body. All horses in this category can benefit from the boost Muscle Max gives to overall lean muscle condition

In breeding stallions and broodmares; High level of antioxidants coming from Vitamin E and Selenium support fertility, while B vitamins assist in the utilisation of energy and L-Lysine is a key component of mare's milk

SUITABLE FOR

All performance horses, young stock, sales preparation, mares and stallions

Item nr: 601592 - 1 liter

Item nr: 601593 - 2,5 liter
